150 chordal bass-line sequences.

C major · CBL-001–CBL-150 · review candidates

75
Five-event bass phrases

75
Six-event bass phrases

Follow the bottom note

These voicings were selected for the bass line after drop-2 conversion. Do not take the melody answer from a previous set or apply drop-2 twice.

Numeric range first

The resulting bass stays within MIDI 36–48, standard C2–C3. Actual selected bass notes span MIDI 38–48. Existing application comments call MIDI 48 “C4”; use the numeric pitches and verified recordings rather than that label. The overall upper limit is MIDI 67, standard G4.

Checked candidates, not an import

All 150 have distinct chord progressions and bass pitch-class answers, no duplicates against the audited source pool, a diatonic majority, complete chord tones and no more than one dim7 event. Bass movements are no larger than five semitones. The current PHP close-position/drop-2 helpers reproduce every supplied voicing exactly.

Exact unshifted piano coverage is verified for all 150. Other instruments have different coverage; consult the JSON validation report. Unsupported combinations must not silently change notes. Listening review and final instrument/register approval remain pending.

Count check: the audited local database had 115 Chordal Bass Lines questions. Adding all 150 would make 265 there. If Claude’s current starting count is 150, adding 50 makes 200 and adding 150 makes 300. Recheck before importing.

Every table shows final sounding notes, lowest first. Inversions refer to the final bass. MIDI and the theoretical spellings identify the actual keys; the separate bass summary uses familiar sounding names. No questions, history, audio attachments or mobile content were changed.
