QUIZ INSTRUCTIONS

Lydian Mode #1

Listen to the bass note and the chord notes above it as one sound. Choose the name that matches what you hear.

1. **Listen to all the notes together**
   Press Play to hear the complete chord sound. Notice the bass note underneath the higher notes. You can listen again whenever you need to.

2. **Choose the exact modal name**
   This lesson compares Lydian and its variants. Select the full name from the answer buttons. Small changes to the chord notes can change its modal colour.

3. **Submit your answer**
   When you are ready, press Submit Answer. You can change your choice before you submit.

Upper chord notes

A	C	E	G	B

F

Bass note · played with all the notes above

Example answer

Lydian

This visual example shows Lydian over F bass. Choose Lydian. In your quiz, listen to the whole voicing and select the full name that matches.

What changes in this quiz?

A voicing is a way of arranging notes to make a chord sound. Here, each modal name has its own set of notes above a bass note. Listen to how those notes sound together. This lesson keeps F as the bass throughout. In the answer names, ♭ means lowered, ♯ means raised and ♮ means natural. A change of one keyboard step counts both white and black keys. The number beside a symbol describes a note's place in the mode, counted from the bass note; it does not mean its position in the displayed chord. Choose the modal name rather than an inversion or a note name.

Answer choices

Lydian | Lydian ♯2 | Lydian Augmented | Lydian Dominant | Lydian Diminished

QUIZ INSTRUCTIONS

Lydian Mode #2

Listen to the bass note and the chord notes above it as one sound. Choose the name that matches what you hear.

1. **Listen to all the notes together**
   Press Play to hear the complete chord sound. Notice the bass note underneath the higher notes. You can listen again whenever you need to.

2. **Choose the exact modal name**
   This lesson compares Lydian and its variants. Select the full name from the answer buttons. Small changes to the chord notes can change its modal colour.

3. **Submit your answer**

Example answer

Lydian

This visual example shows Lydian over F bass. Choose Lydian. In your quiz, listen to the whole voicing and select the full name that matches.

What changes in this quiz?

A voicing is a way of arranging notes to make a chord sound. Here, each modal name has its own set of notes above a bass note. Listen to how those notes sound together. This lesson uses all twelve bass notes. The same modal sound moves to different starting notes. In the answer names, ♭ means lowered, ♯ means raised and ♮ means natural. A change of one keyboard step counts both white and black keys. The number beside a symbol describes a note's place in the mode, counted from the bass note; it does not mean its position in the displayed chord. Choose the modal name rather than an inversion or a note name.

Answer choices

Lydian | Lydian ♯2 | Lydian Augmented | Lydian Dominant | Lydian Diminished

QUIZ INSTRUCTIONS

Mixolydian Mode #1
